## EDUCATION

### Austin Coding Academy

Full Stack Web Development  
Apr / 2019 - Feb / 2020

## TECHNICAL SKILLS

JQuery  
Vue  
Express  
PHP  
SQL

JavaScript  
React  
SCSS  
Wordpress  
Statamic

## WORK EXPERIENCE

### State Built (Feb. 2018-Present)

*Front End Developer*

Collaborate with a team of developers and designers in a fast-paced agency environment. Implement static mockup designs into fully responsive web applications using HTML, SCSS, JavaScript, various front-end frameworks and content management systems. Develop dynamic, reusable components. Maintain Git repositories, reviewing pull requests to ensure code quality and compatibility.

## PROJECTS

### Franklin Building Supply

<https://www.franklinbuildingsupply.com>

*Statamic | Vue | Page Components | SCSS | UX | UI*

- From given designs, I pioneered development on fully responsive components to create a page builder using HTML, SCSS, Vue and Statamic.
- Each component had settings and fields to create a myriad of different layouts.
- Ensured intercompatibility between sections or blocks so that the flow of each page was dynamic but concise.
- Maintained coding best-practices, submitting code to Git with necessary documentation.
- Increased ease of future development by maintaining robust and consistent code.

### ACA Final Project

<http://capstone-project-4503.appspot.com>

*React | Redux | Express | SQL | SCSS | UX | UI | Design*

- Designed and Developed a fully responsive web app using React, Regex, SCSS, and SQL. Hosed and maintained on Google Cloud.
- Taking inspiration from previous work I was able to create custom components for a library of its own.
- Focused heavily on unique but intuitive interactions for a smooth user experience.
- Time was short and some of the technologies were still new to my experience so quick problem solving and thorough documentation reading carried me through.
